

# Recycle Drive exam – the tricky bits

This means that the two subpages should not be on the navigation bar but linked from the Recycling page using thumbnails

## Page template

- A banner including a suitable title and the campaign logo (which should link to [www.therecycledrive.gov.uk](http://www.therecycledrive.gov.uk)). The banner should extend the full width of the page.
- A navigation bar linking to: the home page, the benefits of recycling page and the recycling page.
- The navigation bar should include the home page, benefits and recycle icons (from the IMAGES folder) for the buttons. Each icon should be 60 x 60 pixels. Each icon will need to be edited to create a rollover button.

The banner must be a single image created in graphics software. A set of shapes and individual images is not good enough. The logo (and only the logo) needs to be a hotspot to the web address

This involves editing the images and should be one of the first jobs you do

## File formats

- Images to be in .png format and each individual image must be less than 300 KB.
- Video file to remain in .mov format.

This is a tricky job. It means a standard navigation bar won't work here – you'll need to make your own using **rollover buttons** using the icons.

The image needs to be inside the textbox and then aligned on the right so that the text floats around it – like when you square an image in Word

## Composting page

- Include COMPOST.png from the IMAGES folder on the composting page.
- Include appropriate information about composting.
- Edit the code so that COMPOST.png is positioned on the right of the text and the text wraps around the image.

## Top tips

- From the TOP\_TIPS image, which can be found in the IMAGES folder, choose one of the top tips to create a graphical link that:
  - shows only your chosen top tip
  - links to an image showing all the top tips
  - is included on the home page.

This has multiple stages, You need to edit the image to crop out just one of the top tips. This will then be made into a thumbnail style button which links to a File – which is the image of all the top tips

This means you need to add the logo to the LANDSCAPE image. Then you need to add text to the image – which you need to have written yourself. This is similar to making a banner.

## Landscape

- Edit the image LANDSCAPE.bmp, provided in the IMAGES folder, to include The Recycle Drive logo and add some additional appropriate text that you have written. Place the edited image on the benefits of recycling page. The edited image must be in .png format.

## Video

- The VIDEO.mov, included within the ASSETS folder, should be embedded on a suitable page, retaining its 4:3 ratio. The video should play only on click.

Insert > Media to add a video file. Videos can be tricky to resize – make sure you can do this  
Note: using WebPlus you will **have** to convert the video to **MP4**. It won't embed otherwise.

Add the e-mail link to the footer in the Master Page

## Contacts

- Add an email link for further information. The email address can be found in the INFO.rtf file in the ASSETS folder.
