

# S is for Set Up

1. Open WebPlusX7 (in the Serif new folder)
2. Close the wizard down – don't use it
3. **Properties > Site Properties**
4. **Page Size** – change to 1024px by 768px (or as specified in the exam).
5. **Background** – change **On-page colour** to your background colour
6. **Hyperlinks** – tick box; change colours  
This will ensure that your hyperlinks show up and that you get marks for them
7. **Images** – tick the **Use original names of picture files** box  
**Untick** the **Combine overlapping images into a single file** box

This will make sure you get the marks for file naming and for resizing images

## Change page sizes

1. **Right click** on the **Home** page on the right > **Page Properties**
2. **Appearance** > change page size to 1024px by 768px
3. Open the **Master Page** area
4. **Right click** on > **Properties**
5. Change size to 1024px by 768px

You always have to change the page size for existing pages and the master.  
**REMEMBER: change page sizes 3 times!**

## Create pages

1. Create new pages by clicking on the **+** button in the Pages area
2. Give the page a **name**
3. Give the **filename** a name as well  
This will get the marks for file naming and for creating a logical website
4. Make sure any pages which need to be **child pages** are  
Use the Child Page button to indent them
