

Scripts

Part One: What are Scripts?

1. Describe, in 15 words or less, what the main job of a script is. [2 marks]
2. At what stage in the production process will a script be produced? [1 mark]
3. List **five** types of product that a script could be needed for [5 marks]
4. Identify **three** groups of people who are the audience for a script [3 marks]

Hint: the answer is not the target audience for the product. They will never see the script.
You need to be thinking about the people who will use the script itself.
5. List the five things that might be included on a script: [5 marks]
6. What does the term **dialogue** mean? [1 mark]
7. What is a **voice over**? How is it different from dialogue? [2 marks]
8. On a script, what does the term **character** mean? [1 mark]
9. When talking about scripts, what does the term **direction** mean? Give **three** examples of types of direction that could be included on a script. [4 marks]
10. What does the term **slug line** mean? What **three** things are included on every slug line? [4 marks]
11. What is a **camera shot**? Name **three** types of camera shot that might be used on a script [4 marks]

You will need to know how the five things (question 5) are shown on a standard script.
Create a summary diagram that shows this

Part Two: Producing Scripts

12. Identify **two** types of software you could use to produce a script [2 marks]

Hint: give me two **TYPES** of software (types of program on a computer) you could use
13. Identify **three** pieces of hardware you could use to produce a script [3 marks]

Hint: hardware is something attached to a computer that you can touch
