

Animation Project Brief

You have been asked to make an animated GIF to use on the website for the Caister Lifeboat

The Caister Lifeboat is an independent lifeboat which is not part of the RNLI (the organisation that runs most lifeboats in the UK)

The animation should feature a sailing boat and a lighthouse as well as moving waves. These must be inside a circular coloured border

You may add other elements to the animation

Animation Project Brief

You will need to create:

- a circular frame for the animation to work in
- two sets of waves
- a sailing boat
- a lighthouse and (probably) some land
- any other elements you decide to use

These elements should be created using Illustrator, a vector graphic image software package

Animation Project Brief
