

Codes - steganography puzzle

The puzzle is at

<http://www.bluesquarething.co.uk/kthree/codes/crisps.htm>

I tend not to give children these slides - and obviously not the solution ones. The biggest problem I have is that I can never remember exactly how many pieces of information I hid. Which is annoying. I think it's about 13 or 14.

Everything is to do with potatoes. Honestly, I have no idea why. It seemed like a good idea at the time.

Set it up as - what's the password needed?

Page title

Right click on the image and open in a new tab to get a bigger version

Acrostic - capitalised words

So, this Page has a number of Ultra-clever and Devious ways of hiding Several passwords on it.

- check everything on the page
- hidden passwords could be anywhere
- it's possible that the passwords could be in plain site
- possibly even right in front of your eyes
- so, go on – what are you waiting for?

Acrostic - read downwards

Page URL

Text under barcode = Rosti (a grated potato pancake dish from Switzerland)

QR code - Roast Potatoes

Very small writing here

Small image - right click and open in new tab. Image is of poutine - a French canadian dish

Hidden hyperlink down here - downloads a photoshop file - file then has a hidden layer in it (2 diff types of potato here)

Very small text

Code view: Ctrl + U

Hidden comment in HTML

```
<hr />
<p>So, this Page has a number of Ultra-clever and Devious ways of hiding Several passwords on it.</p>
<!-- The password you are looking for is baked potatoes -->
<ul>
  <li>check everything on the page</li>
  <li>hidden passwords could be anywhere</li>
  <li>it's possible that the passwords could be in plain site</li>
  <li>possibly even right in front of your eyes</li>
  <li>so, go on - what are you waiting for?</li>
</ul>
<p></p>
<p></p>
<p><a href="steg/image.psd">Click here to download the image with the password in.</a></p>
<p class="tiny">Dauphinoise potatoes</p>
```

Filename for large image -
read backwards

This will also show up a number of
other objects that may not have been
found

Code hints

I think there are about 13 words or phrases hidden on the page somewhere

There is a theme. All the information you need is a type of one thing

Using the internet to help is perfectly fine

How else might you get a hint?

Code hints

Have you look at:

- the title?
- the web address?
- the page HTML code?
- blank sections of the page?
- anything really small?
- other ways of hiding information?

Code hints

Have you asked anyone else?

Or looked over their shoulder?

Or e-mailed anyone?

I will try to check my e-mail if I can during the lesson, but I might not be able to

Code hints

What's the theme?
