Give a final score

You can use code like this to give a message at the end (this is based on a 6 mark quiz)

```
Sub final_score()

If score = 6 Then
MsgBox "Awesome, you got all the questions right"

ElseIf score = 5 Or score = 4 Then
MsgBox "Not bad, you're almost there"

ElseIf score = 3 Or score = 2 Then
MsgBox "Well you got some right I suppose"

Else
MsgBox "Hmm, did you press any of the buttons?"

End Sub
```
