

# Making a Website

There's a simple workflow for making a website:

1. **structure** - what pages will I need? How will they fit together?
2. **design** - what will it look like? What is the house style?
3. **master template** - to ensure **consistency**
4. **create pages and add content**

# Making a Website

The **Tropical Rainforest Action Project (TRAP)** needs a simple website to be used by Year 7 children in schools.

The website will be to teach the children about some of the endangered species which live in the rainforest: the Bengal Tiger, the African Elephant and the Golden Poison Frog.

You will need **four pages** in total.

# Making a Website

Structure:

Banner image 800 pixels wide x 150 pixels tall

Single image made using background and three animal images

Hotpot linking  
to animal page

Hotpot linking  
to animal page

Hotpot linking  
to animal page

Banner image 800 pixels wide x 150 pixels tall

Text

Image(s) of your choice

Footer with social media icons

# Making a Website

The website needs to be **attractive** and **easy to use** and **look professional**. It needs to be **consistent** and use **images** creatively.

The banner need to include the TRAP logo and some text. You can add other images to it if you want to.
