Web banner challenge

Make an animated web banner for Duck World

The banner needs the words **Duck World** which should either move or fade in and then move or fade out It also needs an animated duck of some kind

Hints:

Probably easiest as a Video Timeline animation

- make the banner as a new document (File > New) that's 800 pixels wide and 150 pixels high
- add text using the **Text Tool** (the T)
- you may need to convert the duck to a Smart Object (Layer > Smart Objects
 > Convert to Smart Object
- if you want to animate individual words these need to be on separate layers

Web banner challenge

Here's where I placed my keyframes
